***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 10, 24, 30-31,39-40,48,52, are rejected under 35 U.S.C. 102(e) as being anticipated by Thalgott (6,558,424).

With respect to claims 1,10,24, 30-31,39-40,48,52 Thalgott disclose an instrument for inserting into an intervertebral space an intervertebral implant having a top, which in the intervertebral space engages one vertebral surface, and having a bottom which in the intervertebral space engages the other vertebral surface comprising a pair of arms, as shown in FIG.9A, connected to each other and including an upper arm and a lower arm (126,128,122,124), the arms being constructed to close towards each other to enter recesses (138) in the top and bottom of the implant, respectively , to secure an intervertebral implant therebetween and separable away from each other for removal from the intervertebral implant, each arm including at its outer end a recess engaging portion adapted to be inserted in a recess (138 of the intervertebral implant.; as set forth in column 9, lines 1-67; and as best seen in FIGS. 9-10.

Art Unit: 3733

With respect to the method claims, the method steps, as set forth, would have been inherently carried out in the operation of the device, as set forth above.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-23, 25-26, 41-47, 49-51, 53-67 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thalgott (6,558,424) in view of Moskovich (5,431,658).

With respect to the claims, it is noted that Thalgott discloses all the limitations; except for a spacer mounted between the upper and lower arms for engaging the implant as the upper and lower arms secure the implant; as claimed by applicant. However, in a similar art, Moskovich evidences the use of a spacer (26) mounted between the upper and lower arms for engaging an implant (5) as the upper and lower arms secure the implant between the vertebrae while the spacer pushes the implant between the vertebrae and also pushes the end of the lower arms out from between the vertebrae.

Therefore, given the teaching of Moskovich, it would have been obvious to one having ordinary skill in the art, at the time the invention was made to modify the device of Thalgott; as taught by Moskovich to push the implant between the vertebrae and also push the end of the lower arms out from between the vertebrae.

Art Unit: 3733

With respect to the method claims, the method steps, as set forth, would have been obviously carried out in the operation of the device, as set forth above.

***Response to Amendment***

Applicant's arguments, see Remarks, filed 2/7/07, with respect to the rejection(s) of claim(s) 1,10-26,30,31,39-67 under 102/103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Thalgott/Moskovich.

***Conclusion***

A shortened statutory period for reply to this action is set to expire THREE MONTHS from the mailing date of this action.
